terra-area 109 rubber

also available in plastic

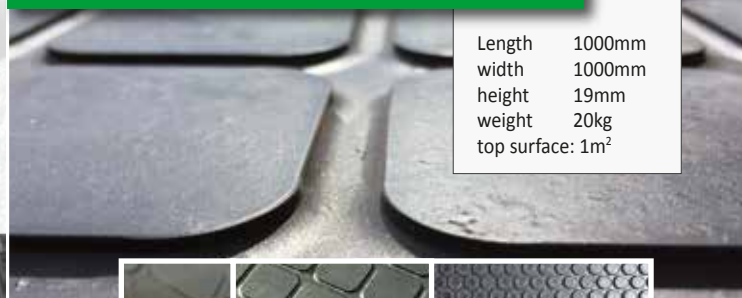

| | |
|----------------|-----------------------|
| Length | 1200mm |
| width | 800mm |
| height | 25mm |
| weight | 20kg |
| load capacity: | 2,5 to/m ² |

Features: tongue and groove system, simple and reliable installation, support rings on the bottom save weight, high thermal insulation and elasticity. Extremely wear-resistant, slip-resistant, ball head pattern for extra surefootedness. Material: solid rubber, also made of plastic

- Open stable • Stalls • Paddock • Campsites • Events

terra-carrera 110 rubber

| | |
|--------------|-----------------|
| Length | 1000mm |
| width | 1000mm |
| height | 19mm |
| weight | 20kg |
| top surface: | 1m ² |

Features: Heat-insulating, stable, resilient, abrasion-resistant, slip-resistant, easy handling, easy to clean. Material: solid rubber

- Stall • Stable • Paddock • Industrial floor • Events

terra-geoline 208

| | |
|----------------|-----------------------|
| Length | 540mm |
| width | 540mm |
| height | 95mm |
| weight | 1,8kg |
| load capacity: | 140 to/m ² |

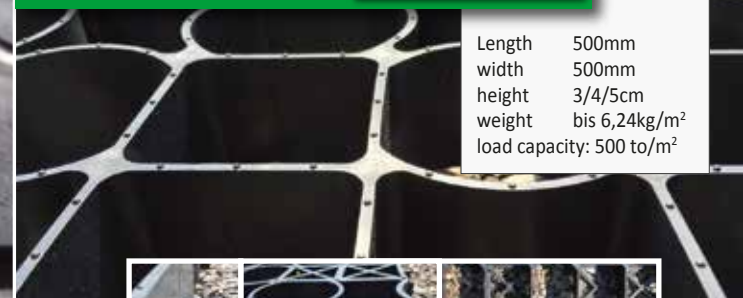

Features: avoids unnecessary sealing, saves costs and protects the environment by saving energy and building materials, can be moved quickly and easily, highly resilient, can be filled with concrete and gravel. Suitable for lawns. Material: HD PE

- Paths • Parking spaces • Driveways
- Stabilization of banks and embankments

terra-floor grit

3 cm (201) - 4 cm (202)
and 5 cm (203)

| | |
|----------------|---------------------------|
| Length | 500mm |
| width | 500mm |
| height | 3/4/5cm |
| weight | bis 6,24kg/m ² |
| load capacity: | 500 to/m ² |

Features: quick water drainage due to high permeability, stabilizes slippery and loose ground, clear separation between substructure and covering, anti-slip effect, UV-resistant, chemically resistant, easy and quick installation with click-lock and pre-connected elements - available in 3 different heights. Material: recycled PE LD

- Paddock • Riding area • Parking spaces
- Strengthening the yard • Open stables

Professional floor structures

Our 12 best systems for all circumstances.

terra
bausysteme

also available without holes

terra-LoMa 126

Length1200mm

width830mm

height38mm

weight20kg

top surface: 1m²

Features: stable and surefooted mat, with the terra-tex® footing offers optimal conditions for a riding area, non-slip, integrated water storage and drainage system. Rideable, even in heavy rainfall. Material: PVC recycling

- Special riding surfaces • Paddock

terra - WeMa 103

Length1000mm

width850mm

height40mm

weight19kg

top surface: 0,8m²

Features: tongue and groove system, simple, self-contained installation. Like the LoMa, provides all the advantages of an extensive drainage. Material: PVC - recycled material

- Special reining ground • Washing places
- Walker • Paddock • Events

terra event mat 128

Length1000mm

width850mm

height27mm

weight16kg

top surface: 0,8m²

Features: tongue and groove system, simple and fast installation, protects existing floor from damage. Material: PVC - recycled material,

- Sporting and cultural events in halls
- Outdoor areas and tents • Circus

heavy-duty plate 102

Length1200mm

width800mm

height43mm

weight32kg

top surface: 0,89m²

Features: tongue and groove system, excellent thermal insulation, high slip protection, chemically resistant, flame retardant, easy and fast assembly and disassembly. Highly resistant up to 3.3 to/dm². Material: PVC - recycled material

- Sporting and cultural events
- Soccer stadiums • Festive events

ProMa 125 A slot

also available without slots

Length1000mm

width8000mm

height30mm

weight19kg

top surface: 0,89m²

fire protection class B1 according to DIN 4102 or C - s2 according to DIN EN 13501

Features: tongue and groove system, simultaneously a separating layer and surface drainage. Incurred water is discharged through the 100-fold slotting, suitable for hard and impermeable surfaces. Easy to clean due to the relatively smooth surface. Water or other fluids are quickly drained downward through the slotting. Material: PVC - recycled material

- Events • Motorsport • Circus • Riding arenas • Paddock

stable stalls - event mat 105

Length1000mm

width850mm

height27mm

weight20kg

top surface: 0,8m²

Features: tongue and groove system, easy installation with a closed surface. Very easy and quick cleaning. Non-skid. Material: recycled PVC

- Stable walkways • Stables • Stalls • Events • Camping • Tents

Greenhouse mat 104

Length1000mm

width850mm

height27mm

weight16kg

top surface: 0,8m²

Features: tongue and groove system, insulating, slight irrigation in ebband flow system through drainage holes. Up to a certain range, a plant is prevented from freezing in a container. No compensation of earth or lava necessary. Can be driven on with small equipment. Material: PVC - recycled material

- Special greenhouses

universal mat 127

Length740mm

width540mm

height55mm

weight15kg

top surface: 0,4m²

Features: tongue and groove system, high stability without changing the subsurface, can be used on both sides - depending on the application, can be driven on conditionally. Material: PVC - recycled material

- Paddock • Feeding grounds • Making courses sturdier • Agriculture
